

Ilche Georgievski

Research Associate

Stuttgart, Germany

www.ilche.io

Summary

I am system-oriented in a sense that I use goals for setting a direction, but I use systems to make progress. I have conducted extensive research and development in the field of automated planning and ubiquitous computing, with particular emphasis on Hierarchical Task Network (HTN) planning and energy efficient buildings. My contribution is the design and implementation of techniques for automation, starting from context processing, through service coordination, to orchestration. Currently, I work as a postdoctoral research associate with the purpose of acquiring habilitation.

My research interests include: automated planning, automation, service coordination, microgrids, ubiquitous computing, cloud computing, Internet of Things.

The outcome of my research has led to several publications in highly reputable conferences and journals. In addition to my research in the field of computer science, I have performed research in collaboration with scientists from other fields, including behavioural sciences and industrial economics.

Experience

Research associate (Habilitation), Depart. of Service Computing, IAAS, University of Stuttgart Since Apr 2018

Research on automation in environments equipped with Internet of Things. Teaching of the Master courses: Smart Cities and Internet of Things, Complex Network Systems, Distributed Systems and Smart Energy Systems (see [Teaching](#) below)

CTO, Sustainable Buildings, Groningen, The Netherlands Apr 2017-Mar 2018

Focus on scientific and technical issues, mainly on long-term and big-picture issues. Establish a technical strategy that is aligned with the company's business goals. Participate in writing customer proposals and customer meetings. Establish a software development process and coordinate a team of developers and operations involved in the process. Help individuals grow into technical leaders. Engage in seminars, conferences and other media activities.

Research scientist, Depart. of Computer Science, University of Groningen Oct 2015-Mar 2017

Research on automation and cloud computing. Development of artificial intelligence planning and orchestrating techniques for energy smart cloud-based applications. Development of an interdisciplinary framework that establishes a relationship between automation and occupant behaviours in buildings. Teaching of the Master courses Distributed systems and Ubiquitous Computing (see [Teaching](#) below). Supervision of students in the context of Master thesis (see [Supervision/Advising](#) below).

Doctoral candidate, Depart. of Computer Science, University of Groningen Jun 2011-Sep 2015

85% research on ubiquitous computing and automation for it. Development of the SH planner, an artificial intelligence planner based on hierarchical models suitable for office buildings. Development of orchestration and coordination techniques for building environments. 10% teaching of the Master course Distributed Systems (see [Teaching](#) below). 5% advising students in the context of Bachelor and Master theses (see [Supervision/Advising](#) below).

Scientific programmer, Depart. of Computer Science, University of Groningen Sep 2010-May 2011

Research on artificial intelligence planning. Extended the JSHOP2 planner to handle phantomisation without knowledge provided explicitly in the domain. Implemented the algorithm of the RuGQoS'10 system for faster QoS-Aware web service composition. RuGQoS'10 participated in the Web Service Challenge 2010 (see [Scholarships and awards](#) below).

Software developer, SOA Competency and CC Center, Maribor, Slovenia Dec 2009-Mar 2010

Development of Designed an innovative application architecture for patient healthcare using SOA and cloud computing principles. Implementation development of the architecture by using IBM WebSphere products. Leded group of students working on the project.

Education

Ph.D., University of Groningen , Groningen, The Netherlands Computer science. Subject of the dissertation: Coordinating services embedded everywhere via hierarchical planning . Supervisor: Marco Aiello .	Jun 2011-Sep 2015
uni.dipl.inž.rač. in inf. (Master's degree equal), University of Maribor , Maribor, Slovenia Final grade 9.62/10 with honours . General curriculum in computer and information science. Subject of dissertation: Service-oriented architecture and cloud computing convergence . Supervisor: Matjaž B. Jurič .	Oct 2005–May 2010
Matura , SOU Gymnasium Josip Broz Tito, Bitola, Macedonia Specialisation in natural sciences and mathematics	Sep 2001-Jun 2005

Scholarships and awards

First and third place, Web Service Challenge RuGQoS'10 system won the third place in the Technical Challenge and first place in the Architectural Challenge.	November 2010
Zois Scholarship , Slovene Human Resources Development and Scholarship Fund Awarded to talented students with outstanding results.	Oct 2009-Jun 2010
State Scholarship , Slovenia Awarded under a range of conditions, such as study success and study field.	Oct 2006-Sep 2009
State Scholarship , Macedonia Awarded to talented students.	Sep 2001-Jun 2005

Funding acquisition

Proposal contributor and writer , Next Generation Building Management System Funded by the Samenwerkingsverband Noord-Nederland under the Vernseller Innovatieve Ambitie (Accelerator Inovative Ambition) scheme	Amount: 10 K€
Proposal contributor and writer , Efficient demand and supply matching by incentivizing end-users in buildings project Funded by the Netherlands Research Organisation and SWEA the ERA-Net (H2020) Smart Grids Plus programme	Amount: 1.4 M€
Proposal contributor and writer , Beijing Groningen Smart energy cities project Funded by the Netherlands Research Organisation under JSTP Smart Energy in Smart Cities programme	Amount: 0.3 M€

Teaching

All courses are thought in English.

Assistant, Distributed Systems Master course DBE14, Herman Hollerith Zentrum, Reutlingen University. Responsible for organising and executing the exercises.	Winter 2019-
--	--------------

Lecturer, Smart Energy Systems Lab Lab course 75650, University of Stuttgart. Responsible for organising and executing the course.	Winter 2018, Summer 2019
Assistant, Complex Network Systems Master course 021601105, University of Stuttgart. Responsible for organising and executing the exercises.	Winter 2018-2019
Assistant, Smart Cities and Internet of Things Master course 021600202, University of Stuttgart. Responsible for organising and executing the exercises.	Summer 2018-
Course coordinator and lecturer, Net-Computing Bachelor course INBNC-08, University of Groningen.	Spring 2017
Tutor, Introduction to Computing Science Bachelor course INBOI-08, University of Groningen.	Fall 2016
Lecturer, Distributed Systems Master course INMDSY-08, University of Groningen. Class taught jointly with Marco Aiello.	Fall 2012-2016
Lecturer, Ubiquitous computing Master course INMUBC-09, University of Groningen. Class taught jointly with Marco Aiello and Doina Bucur.	Fall 2015

Supervision/Advising

Master theses

Amimul Hossain, Service orientation of energy management systems for microgrids, ongoing, University of Stuttgart. Supervisor.

Hamzeh Karbasiyan, Design and implementation of a predictive analytics approach for a smart warehouse management system, ongoing, University of Stuttgart. Supervisor.

Ebaa Alnazer, [HTN planning with utilities](#), November 2019, University of Stuttgart. Supervisor.

Stefan Hill, [Scalable IoT Platforms](#), June 2019, University of Stuttgart. Supervisor.

Prashant Gupta, [A Framework for Learning Activities of Office Buildings](#), May 2019, University of Stuttgart. Supervisor.

Bas de Bruijn, Discovering Features for a Smart Heating System, University of Groningen, August 2016. Daily supervisor (first supervisor [Alexander Lazovik](#)).

Xander Elsas, [Android Energy Management Application](#), University of Groningen, October 2014. Daily supervisor (first supervisor Marco Aiello).

Manuel Martiarena, [Tablet Interface for Smart Environments to Reduce Energy Consumption](#), University of Groningen, August 2012. Daily supervisor (first supervisor Marco Aiello).

Bachelor theses

Matijn Woudt, [An Interface for Managing Smart Office Environment](#), University of Groningen, December 2013. Daily supervisor (first supervisor Alexander Lazovik).

Angèle Croes, [Modeling a Planning Domain for Smart Offices](#), University of Groningen, August 2013. Daily supervisor (first supervisor Marco Aiello).

Jorrit de Boer, [Smart Offices: A Web-based Interface for Task Selection](#), University of Groningen, July 2013. Daily supervisor (first supervisor Marco Aiello).

Mark Hoekstra, [Web-based Interface for Domain Manipulation in Smart Offices](#), University of Groningen, July 2013. Daily advisor (first supervisor Marco Aiello).

Student projects

Dinesh Subhuraaj, Design and implementation of microgrid services, Study project (Studienprojekt), October 2019-. Supervisor.

Kevin Mendes Guido, Alexander Pavlovski, and Christian Reuter, Analysis of AI Planning Systems, Student report (Fachstudien), October 2019-. Supervisor.

Mehmet Ali Tepeli, Javad Zahrabi, and Birasanth Pushpanathan, User Engagement for Smarter Buildings, Project work (Projektarbeit), September 2019-. Supervisor.

Marvin Dostal, Jia Li, and Zhixian Li, Architecture for Automated Planning Systems based on Service Orientation, ProjektINF, November 2018-May 2019. Supervisor.

Interns

Firat Sertgoz, Automated Management of Spark Jobs for processing energy data, Sustainable Buildings, April-July 2017. Supervisor.

Participation in projects

Project associate, MatchIT, partly funded by the Netherlands Research Organisation (ERA-Net Smart Grids Plus) Oct 2018-

Scientific and technical participation in the development of a framework that integrates cross-sectorial expertise on power distribution, control systems, building automation, computer science, and social and behavioural science to improve demand-supply matching in a financially and psychologically way that is attractive and acceptable to end-users.

Project associate and system developer, BIGS, funded by the Netherlands Research Organisation (Smart Energy in Smart Cities) Oct 2015-Mar 2017

Scientific and technical participation in the development of a framework that integrates user behaviours, policies and ICT to reduce demand and promote smart use of energy across different cultures.

Project team member and system developer, GMA2, funded by the University of Groningen (Sustainability Initiative) Oct 2015-Dec 2017

Conceptual and technical participation in developing a solution that controls the heating of offices automatically and optimally.

Project team member and system developer, GMA, funded by the University of Groningen (Sustainability Initiative) Jan 2013-Jun 2014

Conceptual and technical participation in developing a solution that focuses on water conservation, waste recycling, smart reduction in electricity consumption and intelligent lighting.

Project associate and system developer, EnSO, funded by the Netherlands Research Organisation (Smart Energy Systems) Jun 2011-Dec 2015

Conceptual and technical participation in creating an energy-aware framework for offices that incorporates the building context and occupant activities to save energy automatically.

Project associate and system developer, GreenerBuildings, funded by the European Commission (7th Framework Programme) Sep 2010-Oct 2013

Software participation in developing an integrated solution for energy-aware adaptation of public buildings.

Courses

Networking skills, February 2016, HR Excellence in Research, University of Groningen, The Netherlands

Dutch for foreigners, A1-A2 Levels, Alfa-college, May 2013-June 2015, Groningen, The Netherlands.

Course on Computing for Data Analysis, Online, Johns Hopkins University, September-October 2013.

Course on Introduction to Interactive Programming in Python, Online, Rice University, August-October 2013.

Course on Artificial Intelligence Planning, Online, University of Edinburgh, January-March 2013.

Course on Functional Programming Principles in Scala, Online, EPFL, September-November 2012.

IJCAI International Summer School on Artificial Intelligence, Beijing, China, July 16-20 2012.

Training program on Writing Skills for Academics, University Centre for Learning & Teaching, University of Groningen, 2012 (7 days).

Course on Introduction to AI, Online, Stanford University, October-December 2011.

Non-academic activities

Web maintainer and editor of the Distributed Systems group's site, University of Groningen, The Netherlands 2011-1016

Member of Global Researchers Association for Science Popularization, Zurich, Switzerland

2016-2017

Special knowledge and skills

Software engineering languages: Scala, Java, php, Python, Javascript, R, UML, SQL, NoSQL, HTML/CSS.

Software engineering technologies: JSON, RESTful, AngularJS, Play!, sbt, maven, docker.

Agile software development: Scrum framework.

System administration: Windows, Ubuntu/Debian, MySQL, Subversion, Git, YouTrack.

Desktop publishing: \LaTeX , BibTex, Microsoft Office, OpenOffice.

Internet of Things: Raspberry Pi, Plugwise, GrovePi, TelosB, smart meters.
